

Contractor Filter in MortgageBrain Anywhere

A new filter for contract workers has been added to MortgageBrain Anywhere. The filter 'Contractor' can be found in the Attributes section of the Filters tile, as shown below.

This allows filtering to be carried out on lenders that will accept contract workers. The filter works in the same way as the other dynamic filters – by checking the box, this will only source on lenders who will accept contractors.

Additional information on specific accepted criteria can be found in the Lender Notes under the Employment tile, as shown below.
